

OPSCOPILOT

First Client Pitch Guide

Everything you need to walk into a CA firm and walk out
with a signed deal

FOR CA FIRMS & TAX PRACTICES · CONFIDENTIAL · JUNE 2026

SECTION 01

How to Open the Conversation

Do not open with features. Open with a problem they feel every single month.

"How much time does your team spend every month chasing clients for documents, manually checking who has filed and who hasn't, and sending WhatsApp reminders one by one?"

Most CA principals will say **30–40% of staff time**. Some will laugh and say more. That moment — when they admit the number out loud — is your opening. Everything after that is showing them the solution to a problem they just confirmed they have.

What You Show Them — In This Order

1 The GST Filing Calendar

One screen. All clients. Colour-coded. Green = filed. Red = overdue. Amber = documents missing. No spreadsheet, no calling around, no "let me check."

2 Bulk Document Request via WhatsApp

Select 10 overdue clients. Click Request Documents. They each get a WhatsApp with a link. They upload from their phone. Files appear in your dashboard, tagged to that client and period.

3 Collections — One-Click Reminders

Every client who owes fees is ranked by risk. One click sends a payment reminder over WhatsApp. The system enforces a gap — clients are followed up consistently, not spammed.

4 AI Compliance Assistant

Ask it "what documents does a composition dealer need for annual return?" It answers in 10 seconds from your firm's own SOPs. New staff stop making mistakes. Senior staff stop answering the same questions.

5 GSTIN Validation

Add a client — we check their GSTIN with the GST portal in real time. Cancelled registration? Red alert immediately, before you waste time preparing the return.

Demo Rule: Show Only 3 Things

A demo that takes 45 minutes loses deals. Show the filings screen, the document request flow, and the GSTIN validation. Three things. Let them ask about the rest.

SECTION 02

10 Features Worth Highlighting

The first four are table stakes — they show the product is complete. The last six are where you win.

FEATURE 01

GST Filing Calendar

Every client's filing status for the current period. Filed, Pending, Overdue — colour coded. No spreadsheet needed.

FEATURE 02

Document Collection via WhatsApp

Send document requests to 50 clients in two clicks. They upload from their phone. Files land tagged to the right client and period.

FEATURE 03

Collections & Payment Follow-up

All outstanding fees ranked by risk. One-click reminders with enforced intervals — consistent follow-up, no client gets spammed or forgotten.

FEATURE 04

Auto-Generated Reports

MIS Monthly, GST Filing Status, Client Health, Overdue Analysis — generated in 30 seconds with an AI executive summary. Download as PDF.

FEATURE 05 — WINNING

★ Real-Time GSTIN Verification

Add a client and we check their GSTIN with the GST portal instantly. Cancelled or suspended? Red alert before you waste a single hour on their return. Nothing else does this at client creation.

FEATURE 06 — WINNING

★ Filing Readiness Score

Every client gets a 0–100% score showing documents received vs. needed. Know at 9am on the 18th who is a problem — not at 11pm on the 20th.

FEATURE 07 — WINNING

★ Consecutive Missed Months Alert

Any client who has missed 2+ filing cycles gets a flame alert. These are your highest-risk clients, surfaced automatically. No other tool tracks this pattern.

FEATURE 08 — WINNING

★ AI Assistant on Your SOPs

Upload your firm's procedures. Junior staff get your firm's exact answers — not a generic search result. Reduces mistakes, reduces time senior staff spend on repetitive queries.

FEATURE 09 — WINNING

★ Late Fee Exposure in ₹

For every overdue client, see the late fee accumulating per day. Telling a client "you are

FEATURE 10 — WINNING

★ Bulk Actions with Audit Trail

Request documents, send nudges, or mark 30 clients as filed in one action. Every action is

accruing ₹200/day" gets documents submitted faster than any reminder message.

logged — who did what, when. Accountability built in.

The three that make a CA principal lean forward: #05 (GSTIN validation), #07 (missed months pattern), #09 (late fee in rupees).

SECTION 03

The ROI — Put Numbers to It

For a firm with **50 clients and 3 staff** — calculate this live in front of them:

What Changes	Time Saved / Month
No more manual follow-up calls for documents	~15 hours
No more spreadsheet tracking of who filed and who hasn't	~8 hours
Fewer back-and-forth WhatsApps per client	~6 hours
Junior staff self-serve answers from AI assistant	~5 hours
Total saved every month	~34 hours

34 hrs × ₹300/hr = ₹10,200 saved

1 missed filing caught = ₹5,000–10,000 late fee avoided

1 retained client = ₹30,000+/yr

The Cost of Doing Nothing

Most CA firms lose 1–2 clients a year because of a missed deadline or a follow-up that slipped. One lost client at a ₹30,000/year retainer costs more than the annual subscription. Frame OpsCopilot as **retention insurance**, not software.

The WhatsApp Story — Tell This Verbatim

TELL THIS STORY

"Your client Ramesh sends you a document at 11pm on a Sunday. Right now it sits in your WhatsApp until Monday morning when someone remembers to save it and tag it. With OpsCopilot, that document is automatically received, named, tagged to Ramesh's account, and shows up in your filing checklist — before your office opens."

The Live Calculation — Do This in the Room

Before the meeting, find out how many clients they have. Then do this calculation out loud, on paper or on your phone:

[Their client count] × 20 minutes of follow-up per client per month

= X hours/month

X hours × ₹300/hour staff cost

= ₹Y per month being spent on manual coordination

OpsCopilot subscription = fraction of ₹Y

People believe numbers they watched you calculate more than numbers on a slide.

SECTION 04

Objections — Handle These Before They Come Up

“ We already use ClearTax / Tally / spreadsheets ”

OpsCopilot does not replace those. It sits on top. ClearTax files the return — OpsCopilot tracks whether the client sent you the documents to file it in the first place. They work together, not against each other.

“ Our clients are not tech-savvy, they won't use a link ”

They already use WhatsApp all day. The upload link opens in a browser — no login, no app install. If a 60-year-old business owner can forward a PDF on WhatsApp, they can use this.

“ What happens to our client data? ”

Answer this before they ask. Data is stored in encrypted servers. Each firm's data is completely isolated — no data is shared with third parties. We are not ClearTax — we do not use your client data to build competing products.

“ We are a small firm, we can manage manually ”

The problem is not whether you can manage manually today. It is that manual does not scale. When you go from 50 clients to 80, the same team either drowns or you hire. OpsCopilot lets the same 3 people handle 80 clients.

“ We don't have time to set up a new system ”

You do not set it up — we do. I will sit with your team for 2 hours in Week 1. We add all your clients, configure templates, and run through one document request together. Your team runs it independently after that.

SECTION 05

How to Close the Deal

The Commitment That Closes

Do not ask them to buy software. Offer them a guided trial with a safety net:

THE TRIAL OFFER

"I will personally sit with your team for 2 hours in Week 1. We add all your clients, set up the filing templates, and run through one document request together. After that your team runs it independently. If after 60 days it is not saving you time, I will refund the first month — no questions."

Three Things to Add to Win

1 Show the cost of doing nothing

One lost client at ₹30,000/year retainer costs more than the annual subscription. Frame it as retention insurance.

2 Tell the Ramesh story

Documents received at 11pm on Sunday, tagged and ready before Monday morning. That story is more powerful than any feature list.

3 Calculate their number live, in the room

$[\text{Client count}] \times 20 \text{ mins} \times ₹300/\text{hr} = \text{their monthly coordination cost. Do it on paper in front of them.}$

What NOT to Do

Do not show them everything

The AI assistant, reports, collections module — park those for now. Show three things. Let them ask about the rest. A 45-minute demo loses deals. A 15-minute demo that leaves them asking questions wins them.

The Real Reason First Deals Are Won

They are not buying features. They are buying the belief that **you will be there if something breaks**. First client pricing should include your personal WhatsApp number and a commitment to respond within 2 hours during business days.

That is something no incumbent can offer. ClearTax does not give the principal's phone number. You do.

THE ONE-LINE CLOSE

When everything has been said and they are still thinking, end with this:

"Right now your team is doing the job of a system. We give you the system, so your team can do the job of a CA."
